Human-&AI-Centered Product Creator

I lead cross-functional teams to turn big ideas into valuable, real-world products. With a background in human factors and a strong focus on user psychology, I create intuitive, engaging experiences by combining design, behavioral science, and emerging technology. My work is grounded in empathy, collaboration, and a deep understanding of people and systems.

PROFESSIONAL EXPERIENCE

Ping Technologies | Chief Product Officer | 10/2019 – Present

AI-Driven White Label Products & Web3 Metaverse

At Ping Technologies, I help lead efforts to automate systems with AI and bring in new payment technologies like cloud platforms, APIs, and advanced analytics. I'm also building a secure Web3 wallet, a token system, and a rewards program to drive user engagement and loyalty. I partner closely with partners and stakeholders to shape the product roadmap, grow adoption, and ensure we're meeting data privacy standards as we scale.

Strategy & Execution

- Launched IP– Web3 wallet, token system, and rewards engine to drive platform innovation and loyalty
 - Lead product vision, strategy, and execution across multi-platform SaaS and B2B solutions
 - Oversee scalable, secure system development with a focus on seamless user experiences
 - Align product goals with business objectives and customer needs through stakeholder collaboration
 - Manage cross-functional team to deliver features on time and within budget
 - Establish and maintain Agile processes, sprint cycles, and iterative product releases
 - Implement user research and design to deliver intuitive, customer-centered solutions
-

Force Marketing / Helix Technologies | Product Director | 10/2019 – 03/2022

Company Website: <https://www.forcemktg.com/>

Product Strategy & GTM – Automotive SaaS Innovation

Directed product strategy for a cutting-edge SaaS platform in automotive marketing, using VIN-level data and AI to identify vehicles at the critical 90-day lot threshold—enabling faster turnover and improved dealership performance. Led cross-functional teams to integrate intelligent automation and streamline operations, earning the **NADA Award for Automotive Innovation** for industry impact.

Strategy & Execution

- Defined and led the front-end vision across web and mobile, delivering responsive, user-centric experiences
 - Built scalable UI systems and reusable components using modern frameworks (React, Node.js) and clean HTML, CSS, PHP, and JavaScript
 - Led UX design from strategy through execution—wireframes to final visuals—using Figma, Sketch, and Adobe Creative Suite
 - Delivered dev-ready design assets via Zeplin, InVision, and PowerPoint, enabling smooth collaboration and accurate implementation
 - Designed branded visual assets including logos, motion graphics, email campaigns, and presentations
 - Executed cohesive go-to-market strategy across digital channels (Google, social, and email), enhancing brand impact and engagement
-

TripFiles | Senior UX/UI Designer - Contract | 07/2018 – 10/2019

iOS App: On App Store

Mobile Product Design – Private Travel Network

Designed a private social travel platform for a high-profile client, delivering seamless experiences across iOS and Android. Led the UX/UI strategy to introduce monetization features, transforming the business model and unlocking scalable growth with measurable ROI.

Strategy & Execution

- Crafted intuitive user flows and responsive mobile designs through UX research and prototyping
 - Developed custom UI systems, icons, and assets using Sketch and Adobe Illustrator
 - Delivered dev-ready assets via Zeplin and InVision, ensuring smooth handoff
 - Designed marketing visuals for the App Store, Google Play, and cross-platform campaigns
-

Amplifi | Lead Designer - Contract | 03/2018 – 12/2018

Company Website: <https://goamplifi.com/>

Cloud Technologies – Data Management (MDM)

Redesigned and custom-coded Amplifi's WordPress site with integrated video and SEO, elevating digital presence and lead generation. Created branded collateral that helped secure a multi-million-dollar partnership with Starbucks by showcasing their advanced data forensics platform.

Strategy & Execution

- Created Brand and Visual Design documents
 - Built a responsive, SEO-optimized website with embedded multimedia and clear user flows
 - Refreshed brand identity with updated visuals, print collateral, and conference displays
 - Delivered design assets that supported enterprise sales and high-profile business growth
-

Banyan Hills Technologies | Senior UX/UI Designer - Contract | 01/2018 – 06/2018

Company Website: <https://www.gocanopy.com/>

SaaS Design & Product Innovation

Designed UX/UI for complex SaaS platforms across industries, including petroleum infrastructure with ethanol management and advanced robotic pump technologies. Created a customer-facing bowling app for one of the nation's largest chains, boosting engagement and operational flow.

Strategy & Execution

- Led UX strategy, wireframes, and front-end delivery for innovative mobile and SaaS solutions
 - Designed animated interfaces, marketing videos, and app assets to support go-to-market efforts
 - Delivered dev-ready front-end components for seamless implementation
-

Aces Health | Product Lead / Senior UX/UI Designer - Contract | 07/2017 – 12/2018

Healthcare Platform Design & HIPAA Based Smart Contracts

Built HIPAA-compliant healthcare platforms for leading pharma and research orgs, enabling secure data sharing across patients, doctors, and researchers. Designed smart-glasses-integrated systems for epilepsy treatment, driving innovation in data capture and analysis.

Strategy & Execution

- Led UX/UI for iOS, Android, and web apps, streamlining workflows and ensuring accessibility
 - Delivered secure, research-driven interfaces for healthcare and clinical environments
 - Created branded marketing assets, trade show materials, and supporting collateral
-

2016 RIO Olympics – NBC Comcast / Cox Media | Lead Editorial Marketing Designer - Contract | 07/2016 – 09/2016

Company Websites: [NBC](#) / [Cox Media Group](#) / [Olympics](#)

Xfinity Platform Development – Olympic & CTV Content Design

Led design team on the Xfinity platform for the Olympic Games, delivering immersive themes, scores, and real-time event content. Developed branded CTV assets across shows, movies, and music for millions of viewers on set-top boxes.

Strategy & Execution

- Oversaw campaign planning, SEO tagging, and content tracking in X1 CMS
 - Delivered analytics-driven music playlists and on-demand video UX
 - Created branded templates and event graphics across major networks
-

University of Virginia | Civil Rights Project – Lead Consultant – Contract | 07/2016 – 03/2018

Company Website: <https://teachersinthemovement.com/>

Digital Storytelling – Civil Rights Education Platform

Led the development of a digital storytelling platform highlighting the integration of Black students and teachers into white classrooms. Partnered with University professors and PhDs to produce mini-documentaries, real narratives, and rich educational content.

Strategy & Execution

- Directed design, branding, and front-end WordPress development
 - Oversaw music, video production, and a cross-functional team of creators
 - Provided SEO strategy, social media assets, and training for content creation workflows
-

Moxie Media & Marketing | Lead Design Consultant – Contract | 03/2016 – 07/2016

Company Website: <https://thepartnership.com/>

Content Creator, Web Development & Geolocation Systems

Created responsive WordPress websites and mobile applications, transforming design concepts into functional platforms. Designed branding and digital assets while implementing geolocation mapping systems to track and manage nationwide dairy distribution.

Strategy & Execution

- Designed mobile apps and websites for iOS and Android
 - Integrated SEO tools, analytics, and real-time location tracking systems
-

DoMyOwn | UX/UI Design Director | 03/2014 – 03/2017

Company Website: <https://www.domyown.com/>

E-Commerce Transformation & Brand Expansion – Do It Yourself Platform

Led product, UX, and marketing strategy to scale a B2B/B2C e-commerce platform from **\$14M to \$64M in two years**. Repositioned the brand from pesticide retail to an eco-conscious alternatives, family-friendly platform through behavior-driven design and educational content.

Strategy & Execution

- Directed UX/UI strategy, A/B testing, and responsive design for web and Amazon
 - Built AWS-backed infrastructure and dynamic shipping systems
 - Collaborated with Bayer and Monsanto to expand offerings and market reach
 - Delivered brand assets, campaigns, infographics, and trade show collateral
 - Created highly effective email campaign themes
-

Red Tree Labs (SaaS) | Senior UX/UI Design Lead Consultant | 07/2015 – 02/2016

Company Website: <https://theorg.com/for-companies>

Tech Innovation Platform Design – Investor & Creator Collaboration Hub

Designed and developed a platform connecting investors with tech creators and projects, enabling profile building, progress tracking, and community engagement through a built-in social system.

Strategy & Execution

- Created UX/UI wireframes, user flows, and data-driven dashboards
 - Delivered responsive WordPress and front-end development for launch
-

LexisNexis – Senior UX/UI Designer / Human Factors Engineer | 05/2013 – 03/2014

Company Website: <https://risk.lexisnexis.com/>

Best of Brand, White Label Product Design – Risk Solutions Platform

Led front-end and product leadership teams to consolidate three security products into a unified, white-label platform for fraud detection, data forensics, and threat management. Served top-tier clients in finance, telecom, and law enforcement with a scalable, secure product for big data environments.

Strategy & Execution

- Directed front-end design and development for enterprise-grade systems
 - Collaborated with product and dev teams to align business and tech goals
 - Led UI security strategies across the organization's UI team leads, incorporating data forensics, privacy compliance, and cross-functional execution
 - Created white-label system for law enforcement and corrections to track inmate and ex-offender real-time data geographic data for crime mapping and predictions
-

CardLytics | Senior UX/UI Designer | 07/2012 – 05/2013

Company Website: <https://www.cardlytics.com/>

Automated Ads and Offers – BankAmeriDeals Platform for Financial Institutions

Designed and developed a white-label platform for embedded ads and offers within banking apps for major financial institutions, including Bank of America. Worked with front-end and back-end teams to deliver a secure, scalable system that powered BankAmeriDeals, enabling offer approvals, tracking, and user engagement.

Strategy & Execution

- Led UX/UI for internal and external mobile and web apps in a .NET environment
 - Built dashboards for transaction-based campaign management and analytics
 - Collaborated with banking partners to integrate secure, compliant marketing systems
 - Enhanced user experience and drove new revenue through embedded offers delivery
-

Red Cedar Solutions Group / Copper Run Capital | Design Director | 11/2010 – 07/2012

Company Website: <https://copperruncap.com/>

Student Data Platform Creation – State of Michigan Education Data Analytics

Built a statewide education technology system using Michigan's student data to diagnose low performance and deliver personalized learning solutions. Collaborated with state leaders, educators, and data scientists to create engaging, student-focused tools.

Strategy & Execution

- Directed UX/UI design and front-end development for K–12 and higher ed systems
 - Designed interactive dashboards, analytics charts, and secure data tools
 - Developed platforms for administrators, educators, and students across public education
 - Supported real-time, data-driven decision-making to improve academic outcomes
 - Created white-label system for Ohio State Corrections to track inmate and ex-offender real-time data
-

AT&T / Wipro Technologies | Mobile UX/UI Designer | 1/2010 – 2/2010

Company Website: [AT&T](#) / [Wipro](#)

Native Frameworks UX/UI Design – First-Generation Mobile Devices

Collaborated with AT&T and Wipro to design the first generation of smartphone interfaces, positioning AT&T competitively against Apple's iPhone. Led UX/UI design and produced visual documentation to guide offshore engineering teams.

Strategy & Execution

- Created high-fidelity wireframes, native app flows, and UI assets
 - Directed visual documentation for offshore teams in India
 - Delivered engaging mobile experiences that supported successful market launches
-

Dr. Oz / ShareCare | Senior UX/UI Designer - Contract | 11/2009 – 12/2009

Company Website: [Dr. Oz](#) / [ShareCare](#)

Mobile App Design – Health Education Platform

Designed and developed a mobile pregnancy app to accompany Dr. Oz's book **You: Having a Baby**, featuring interactive 3D ultrasounds synced to trimester stages. Contributed to Dr. Oz's website and partnered with ShareCare to build health content and digital experiences.

Strategy & Execution

- Created iOS app UX/UI and final design assets for development
 - Designed health articles, show schedules, and branded content
 - Collaborated with ShareCare on platform integration and user engagement
-

WebMD – Senior Web Designer – Contract | 12/2008 – 2/2009

Company Website: <https://www.webmd.com>

Redesign & Digital Ad Systems – Healthcare Platform

Led the 2nd generation redesign of WebMD, transitioning creative operations in-house from a New York based

agency. Built ad systems, video-based articles, and healthcare content while storyboarding multi-million dollar campaigns for major pharmaceutical brands.

Strategy & Execution

- Directed redesign of site architecture, ad platforms, and video integration
 - Created wireframes, mockups, and layouts for large-scale sponsored content
 - Mentored junior designers and streamlined internal design workflows
-

University of Georgia – Arts and Sciences – Principal Web Developer – 06/2002 – 12/2008

Company Website: [UGA](#) / [Franklin College of Arts & Sciences](#)

Campus-Wide Technology Development – Education in Arts & Sciences

Spearheaded the design and development of 40+ department websites and digital platforms spanning disciplines from humanities and sciences to the arts. Developed visual identities, content strategies, and multimedia experiences that elevated academic branding and engagement across the campus. Collaborated with faculty on grant-funded research tools and digital education projects, delivering high-impact platforms under the Dean's Office that generated recurring revenue through premium services.

Strategy & Execution

- **Pioneered the launch of the first Digital Library of Georgia**, curating historical archives, academic resources, and cultural collections in collaboration with the university's library system.
 - Led campus-wide technology and creative initiatives for 40+ departments and programs
 - Built a student based, educator-focused curriculum platform supporting digital academic delivery
-

NC Zoo / NC Zoo Society | Webmaster | 06/1997 – 06/2002

Company Website: [NC Zoo](#) / [NC Zoo Society](#)

Theme Park Design – Creative & Technology Leader

Spearheaded multidisciplinary initiatives at one of the world's largest and most respected zoological parks, blending design, technology, and education to support conservation and public engagement. Collaborated with educators, veterinarians, researchers, and executive teams to deliver immersive experiences for millions of visitors.

Strategy & Execution

- Led the creation of interactive signage, sculptures, and interactive touchscreen exhibits using National Geographic footage and custom content
 - Produced multimedia assets, including streaming, video, audio, and photography, for exhibits, marketing, and educational materials
 - Developed the zoo's website and first e-commerce platform integrated with POS systems for retail, dining, and ticketing
 - Supported departments across operations, research, and education with web, marketing, and content solutions
-

EDUCATION & EXPERIENCE

- **Graphic Design** – Bessemer State Technical College (1992)
